To whom it may concern

Re: Use of Hand Tools on Site

I hope this letter finds you well. I am writing to clarify our company's policy regarding the use of hand tools on client sites.

As part of our internal procedures and safety protocols, NMT currently only uses hand tools in our controlled head office environment. For reasons of both safety and operational efficiency, we do not use hand tools on client sites. This is to ensure that any work carried out meets the highest standards of safety and is performed using the appropriate tools and equipment suited for each specific task.

Should you require any specific tools or equipment for tasks on-site, we would be happy to discuss the provision of these resources and ensure everything is in place to meet both our standards and your requirements.

We appreciate your understanding and cooperation. Should you have any further questions or need clarification on this matter, please do not hesitate to contact us.

Thank you for your continued partnership.

Yours sincerely,

GWhite
